SUBJECT:

Front Brake Calipers

MODELS:

GT-6, GT-6 +, TR-4A,
TR-250 and TR-6

A new type of front brake caliper known as the "16 PB" has been introduced by Messrs. Girling to replace the existing "16 P" type.

These two calipers are interchangeable as an assembly, but care must be exercised when overhauling either units to insure that the correct repair kit is used. The appropriate part numbers are as follows:

"16 PB" Type. Repair kit to service one single caliper unit. # 519733.

"16 P" Type. Repair kit to service one single caliper unit. # 519732.

The sketch on the reverse side shows the physical difference between the two calipers.
