SUBJECT:

Triumph Tool Board

MODELS:

At long last the Triumph tool board has become a reality - A TOOL FOR TOOLS to protect the dealer's investment. It will reduce tool loss and eliminate time wasted searching.

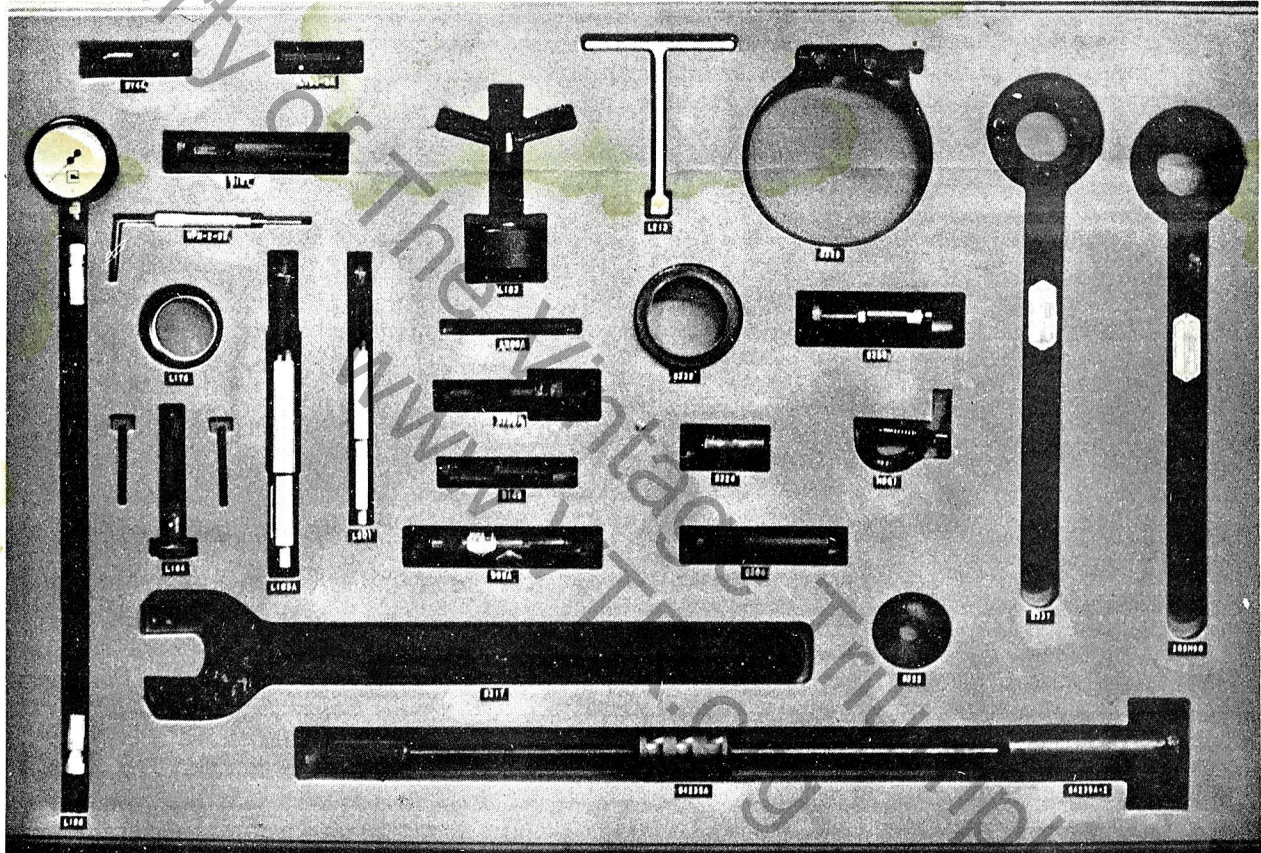

The board, as you can see from the enclosed photograph is made of super high impact plastic and designed in three sections. The sections hold the specialized tools used in servicing gearbox, overdrive, engines and rear axle. The tools are held in precisely moulded deep drawn cavities shaped to the dimension of each tool. It is suggested that the new Triumph service sign be placed above the board, making it a very effective complete service display.

The value of the complete tool board is well over \$175.00. Your Distributor can supply it to you at a very substantial saving. They are doing this to attain 100% dealer participation.

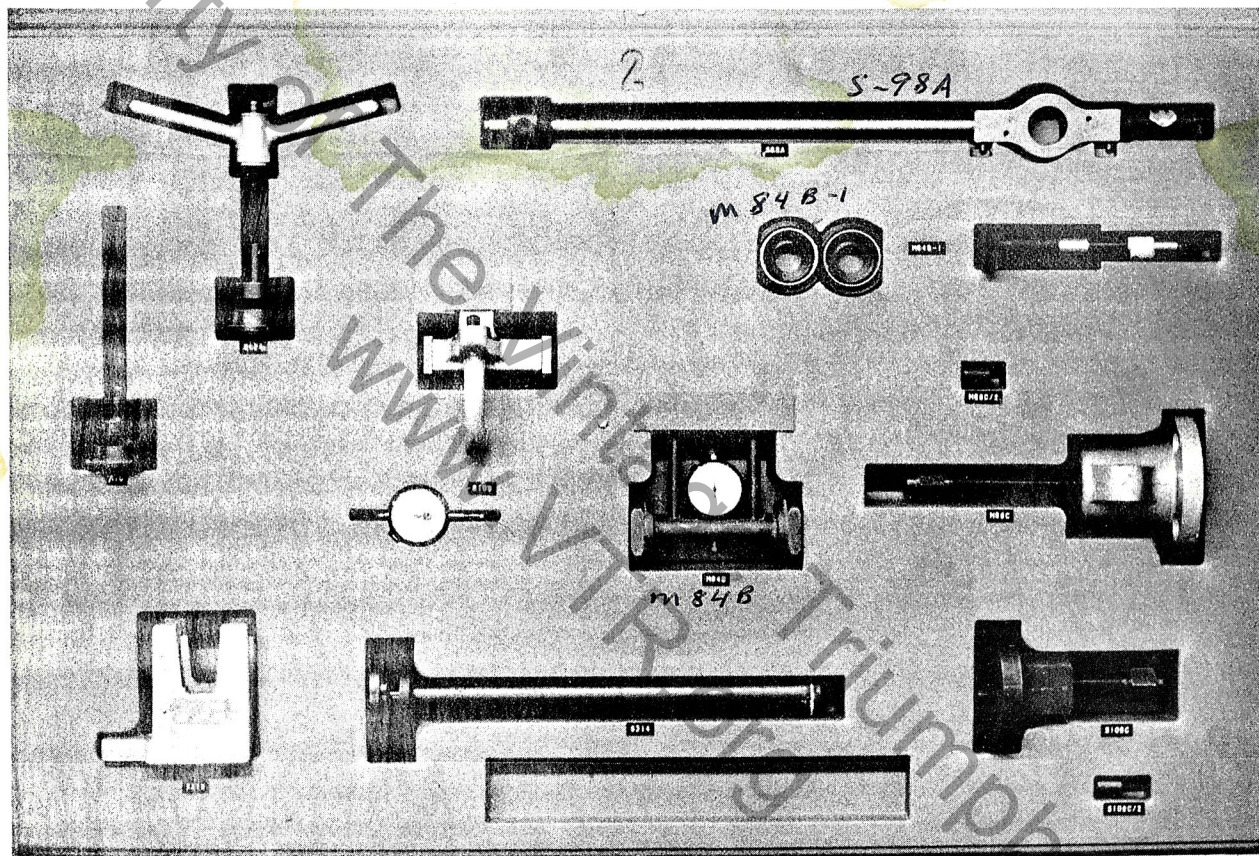

Please place your order with your Distributor under part number DID 37.

A TOOL FOR TOOLS, another step in the continuing program in the Development and Improvement of Dealers.
