TRIUMPH

October, 1971

SUBJECT:

New Vehicle Dewaxing

MODELS:

All Models

We wish to emphasize the importance of using only the correct type solvents when removing protective wax coatings and protective tape from all new Triumph vehicles.

The product which closely meets the Factory's required specifications for a dewaxing fluid is Zep Formula 9762. This product is readily obtainable throughout the United States. Details of distribution may be obtained by contacting Zep Manufacturing Company, 1310 Seaboard Industrial Blvd., N.W., Atlanta, Georgia 30301.

The use of strong solvents containing petroleum based spirits may cause damage to the various plastic and polycarbonate parts fitted to new vehicles.
